

Segregation Table

The table on the next page shows the general requirements for segregation between the various classes of dangerous goods.

Since the properties of substances or articles within each class may vary greatly, the individual schedules should always be consulted for particular requirements for segregation as these take precedence over the general requirements! Segregation should also take account of a single subsidiary risk table

Class	1.1 1.2 1.5	1.3 1.6	1.4	2.1	2.2	2.3	3	4.1	4.2	4.3	5.1	5.2	6.1	6.2	7	8	9

Numbers and symbols relate to the following terms as defined in this section:

- 1 - "Away from"
- 2 - "Separated from"
- 3 - "Separated by a complete compartment or hold from"
- 4 - "Separated longitudinally by an intervening complete compartment or hold from"
- X - The segregation, if any, is shown in individual schedules

* - See subsection 6.2 of the introduction to class 1 for segregation within class 1.

** - Including self-reactive and related substances and desensitized explosives.
